Receive Permit Request

```
graph TD; A[Receive Permit Request] --> B[Date Stamp Documents]; B --> C[Log Request]; B --> D[Log Unknown Documents]; C --> E[Assign Request]; D --> F[Match to Request]; D --> G[Dead File]; F --> H[ ]; E --> I[ ]; H --> I;
```

The flowchart illustrates the process of handling a permit request. It begins with a top-level box labeled 'Receive Permit Request'. An arrow points down to a box labeled 'Date Stamp Documents'. From this box, two arrows branch out: one to the left pointing to 'Log Request', and one to the right pointing to 'Log Unknown Documents'. From 'Log Request', an arrow points down to 'Assign Request'. From 'Log Unknown Documents', an arrow points down to 'Match to Request', and another arrow points down to 'Dead File'. From 'Match to Request', an arrow points down to an empty space, which then continues down to join the arrow from 'Assign Request'.
